Making Insect Sculptures

twinkl

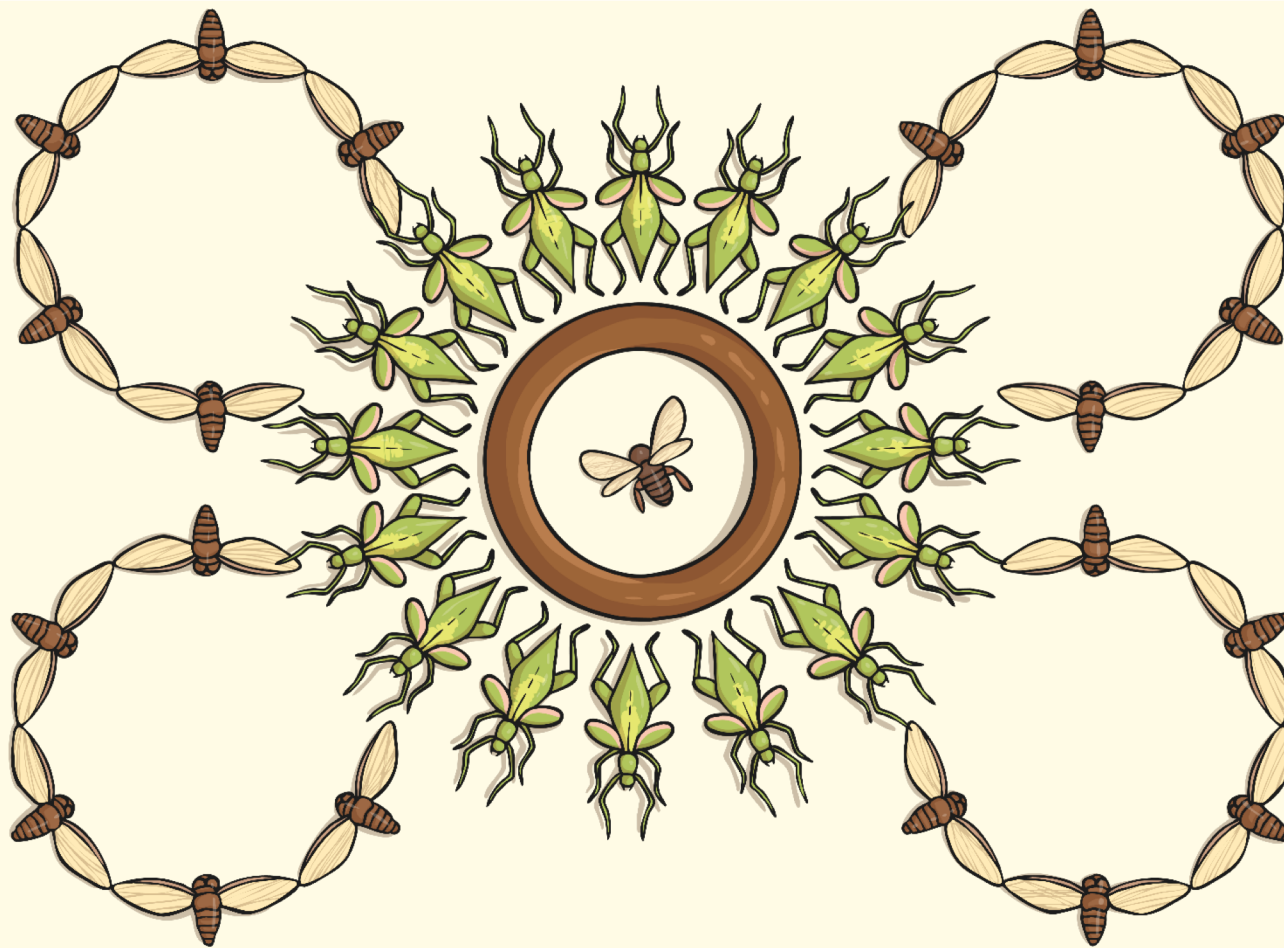

Aim

- I can make a 3D model.
- I can tell you about the artist Jennifer Angus.

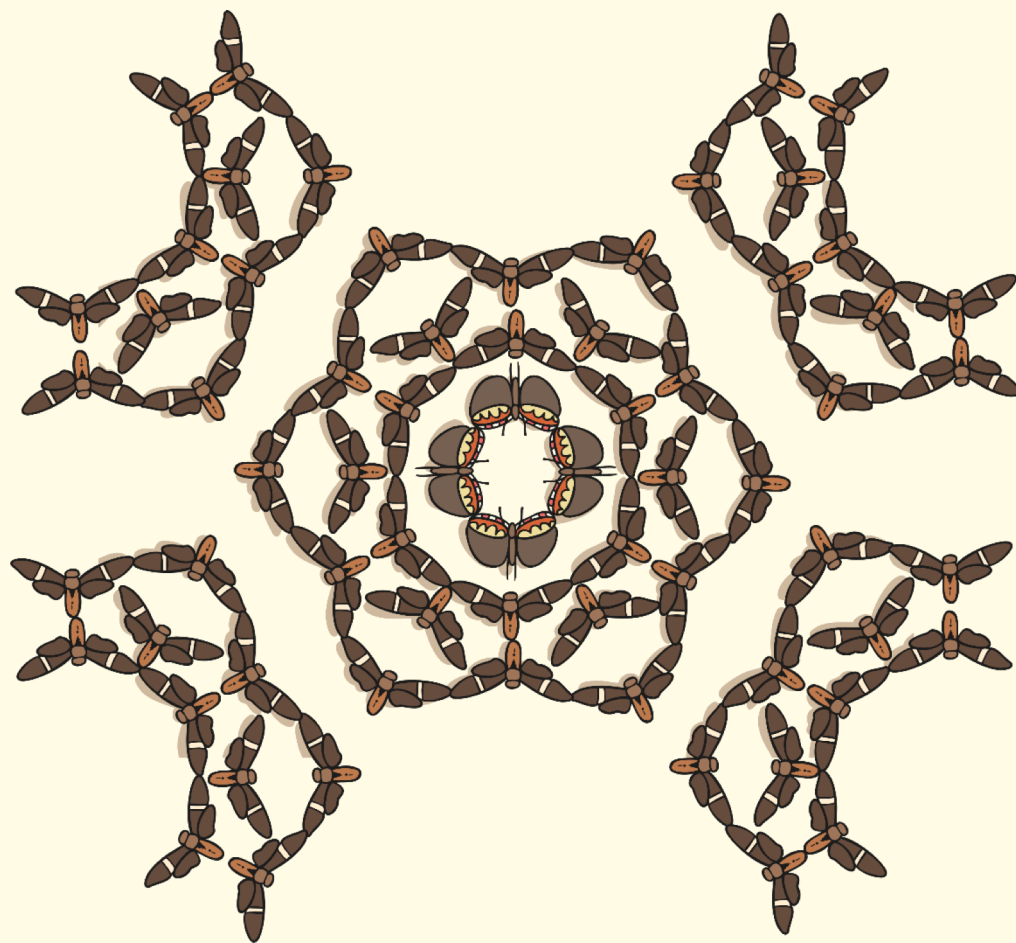

Success Criteria

- I can roll and scrunch paper.
- I can fix modelled paper into place with tape to make an insect shape.
- I can tell you the names of at least two pieces of Jennifer Angus's artwork.
- I can tell you two interesting facts about Jennifer Angus's life.
- I can share something interesting about her work.

Jennifer Angus

Looking at Pattern

All About Jennifer Angus

(Born 1961)
Canadian

Angus was originally a textile artist.

Angus pins dead insects to the walls in patterns that repeat. She wants to make the insects look beautiful.

All of the insects she uses in her work are real. She owns over 30,000 bugs.

Angus tries to use Victorian patterns to inspire her insect designs.

Angus hopes that her work will make people interested in insects so that more people will help to fight against the destruction of their habitats.

Although Angus uses real insects, she tries to reuse the insects from her exhibitions for future displays. If the insects become damaged she tries to repair them, or she donates them to school children for studying.

Jennifer Angus

Look at your image.

What can you see in the picture?

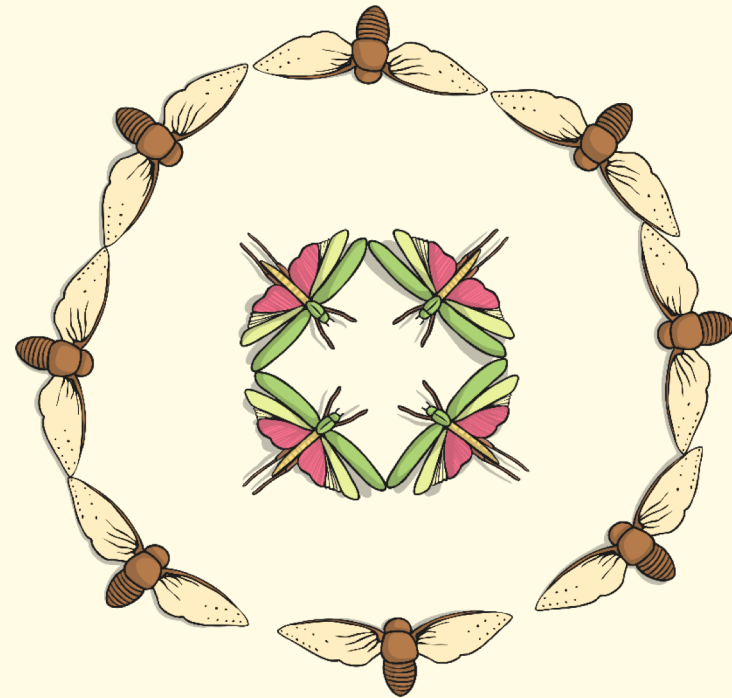

Which material has been used to make the artwork?

What has the artist made?

Why do you think the artist made it?

How does the image make you feel?

Do you think her work is controversial? Why?

Making Insect Sculptures

Equipment: newspaper, sellotape or masking tape.

1. Decide which insect you will be making.
2. Roll a sheet of newspaper into a ball.
3. Cover the newspaper ball in a sheet of paper. Secure with a piece of tape. This will be the head.
4. Repeat this process for the thorax and the abdomen.
5. Carefully secure each of the body parts together. Make sure the parts are strongly attached.
