

The Ice Monster!

Fiction age 5-10

What the book is about

The book starts off with a girl and she is in an orphanage with a very evil and ugly lady and this lady who makes the girl and the other orphan children have mud baths and make them eat bugs. However the girl makes an escape to the city next door. As the girl was poor she had

to make money, so the girl tries to make money by grabbing newspapers out of the bin and trying to sell them but everybody had already read them all. Suddenly she notices that there is a big ice monster picture stuck in ice where people are trying to drill into it. She was so pleased to see an ancient creature being found, until she found out they were going to stuff it. But would she save it from being stuck in the ice?

My favourite character is the girl for being brave leaving the orphanage.
